WEBSITE PAGES AND THEIR PURPOSE

`index.html`   Homepage – introduces the website and provides navigation to all other pages.

`personal.html`   Displays personal background – name, age, hobbies, likes, dislikes, and values.

`education.html`   Highlights academic background – schools attended, subjects studied, qualifications.

`skills.html`   Lists skills and achievements – e.g., technical skills, soft skills, certifications.

`professional.html`   Shares professional aspirations – career goals, resume details, and ambitions.

`development.html`   Discusses personal development – goals, plans for self-improvement, learning habits.

`personality.html`   Describes personality traits – strengths, weaknesses, and how you interact with others.

`storyboard.html`   Displays a storyboard or visual layout of how the site or portfolio was planned.

`references.html`   Shows references – quotes, mentors, books, or people who inspired your journey.

LIST OF FEATURES TO BE USED ON THE WEBSITE

- ❖ **Image Gallery**
  To display personal photos, achievements, and events visually.

- ❖ **Interactive Navigation Menu**
  To allow users to easily explore different pages of the site.

- ❖ **Downloadable PDF Files**
- ❖ Such as a resume and the storyboard document.
